

Enterprise Security Profile Model (ESPM)

- ▶ Presented by Kent Pankratz, MSISA, CISSP
kent@veritysecurity.com, 608-515-8849
- ▶ January 5, 2018

Presentation Summary

- ▶ Review the Enterprise Security Profile Model (ESPM)
 - ▶ Purpose
 - ▶ Functions
 - ▶ Capabilities
- ▶ Illustrate how the ESPM incorporates the NIST Cybersecurity Framework
- ▶ Answer questions and/or provide a demonstration
 - ▶ Review the ESPM Mappings to the Framework

CISO Concerns

The Purpose of the ESPM

What is the Security Profile?

Facilitate
communications

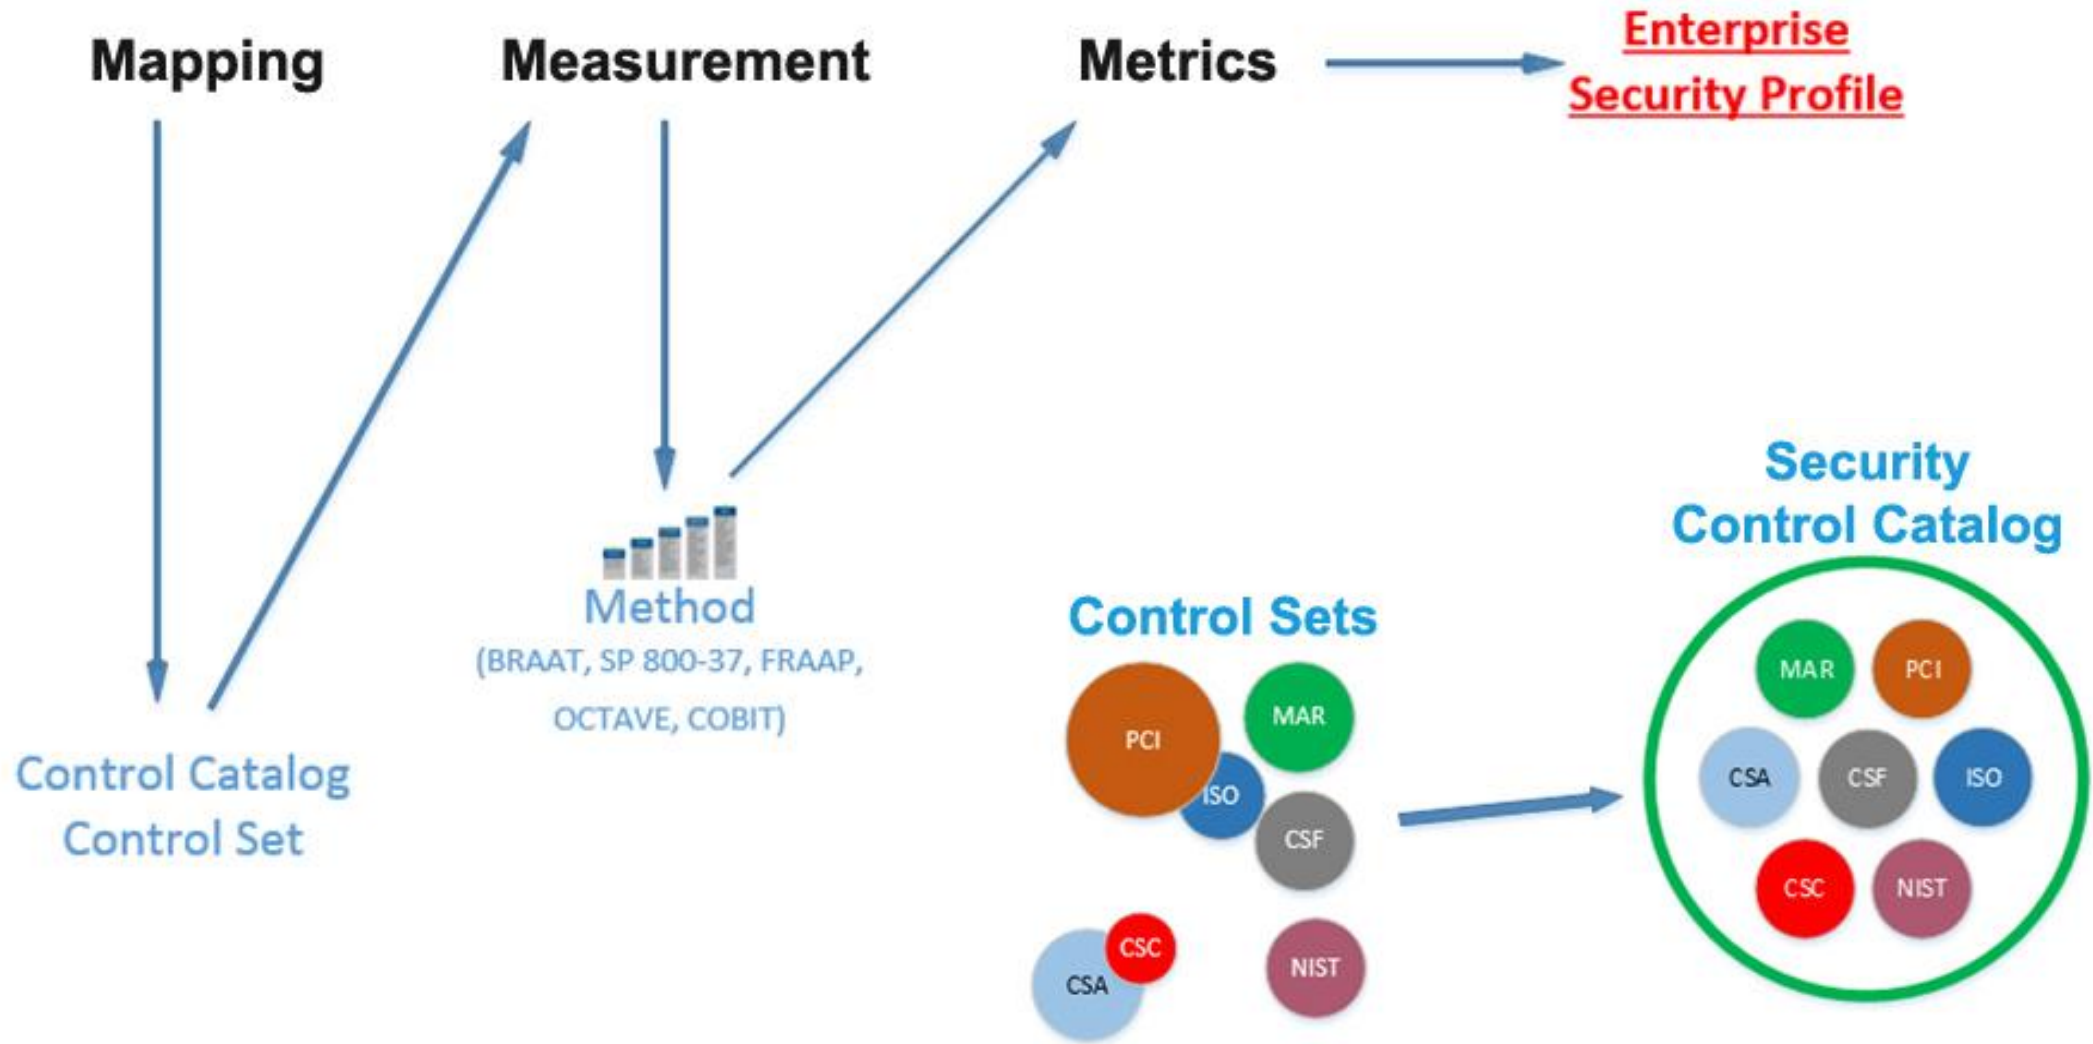

Generate
support and trust

Create a wholistic
governance strategy

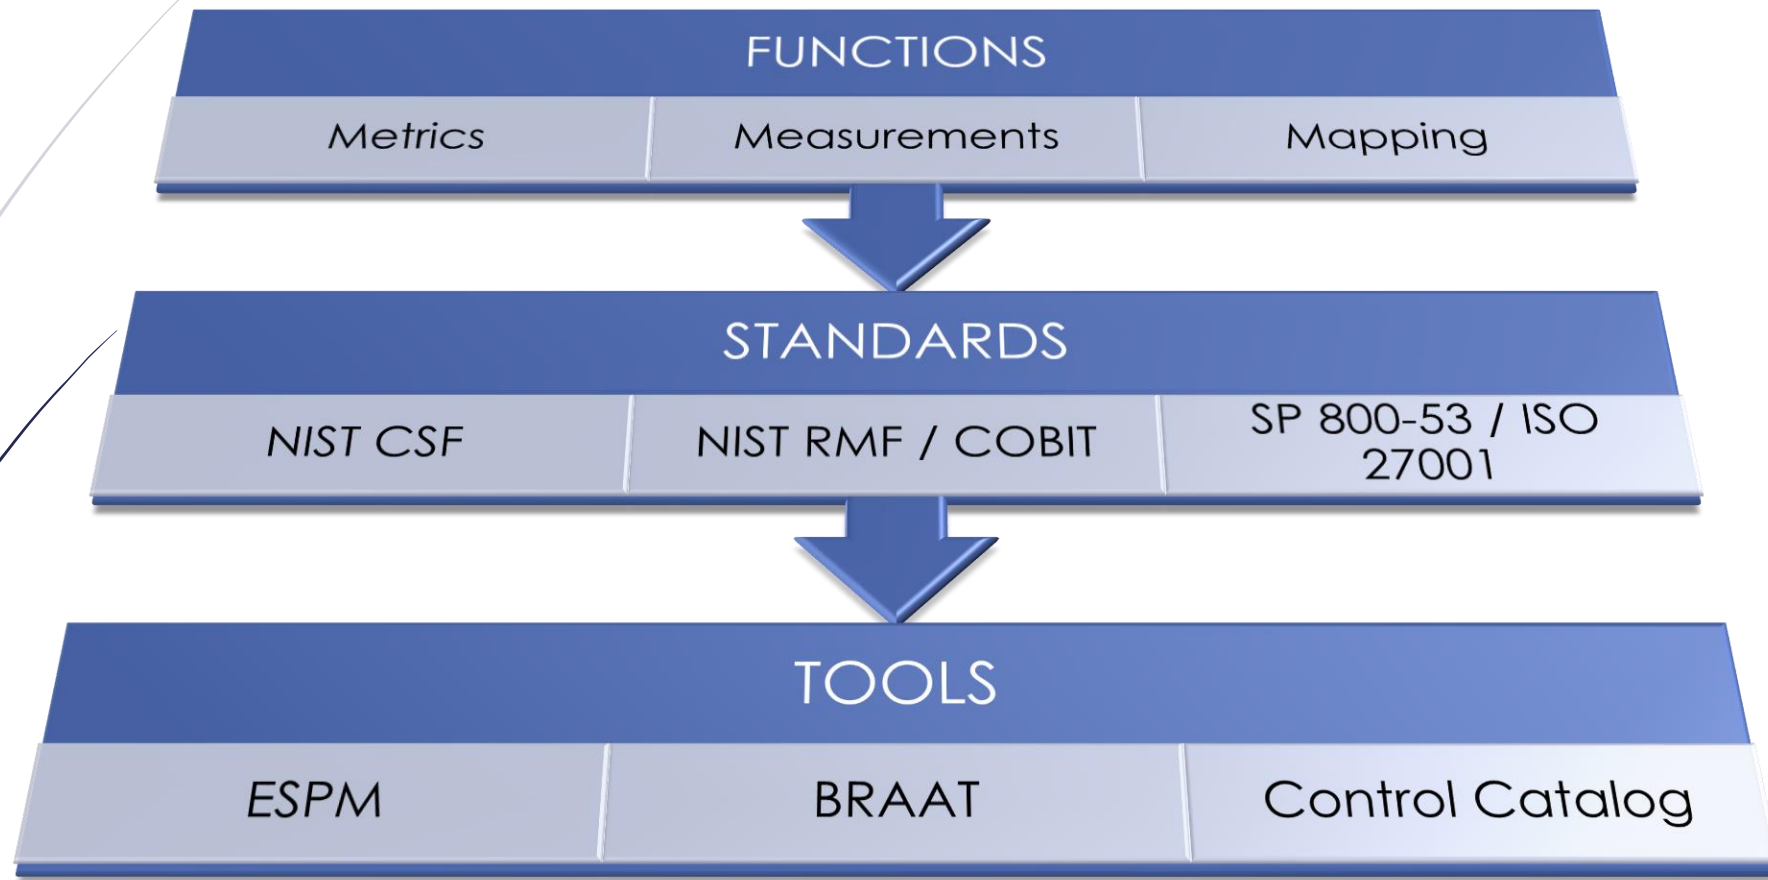

Merge
compliance with
risk analysis

Establish a
security risk management
lifecycle

| | 2.1-4.3 | NIST 800-53, AC-5 | |

Intermission

- ▶ The Enterprise Security Profile Model (ESPM)
 - ▶ Identifies the current security performance of an organization
 - ▶ Utilizes the mapping of controls, measures them, and provides metrics for decisions
 - ▶ Facilitates communication and trust that the security controls are performing
- ▶ The NIST Cybersecurity Framework is central to the ESPM
 - ▶ The mapping of controls is a one-to-one correlation to the descriptions of the controls

Next:

- ▶ Answer questions and/or provide a demonstration
